TECHNICAL SKILLS

- Programming:** Java, Python
- Frameworks:** Spring Boot
- Database Systems:** MySQL
- Web development:** HTML, CSS, JavaScript
- Developer Tools:** Git, VS Code, IntelliJ IDEA, Jupiter Notebook

HIGHLIGHTS

- Sports:**
 - member of the Cricket Team at Sumangalodaya secondart School

ABOUT ME

An energetic and responsible individual with a strong ability to tackle challenges and achieve objectives. Loves problem-solving and continuous learning. An excellent team player with strong management skills, committed to delivering high-quality results and driving success.

EDUCATION

- Sri Lanka Institute of Information Technology (SLIIT)** 2024 - PRESENT
BSc Hons in Information Technology specialized in Artificial Intelligence
- St. Aloysius College, Galle** 2009 - 2023
G.C.E. A/L 2023: 2S Passes and C pass (Physical Science Stream)
G.C.E. O/L 2020: 6A Passes and 3B Passes

PROJECTS

- Real State Agent Finder and Appointment System** FEBRUARY - JULY 2025
 - Contribution:** Developed a comprehensive platform to connect users with real estate agents, featuring advanced search filters based on location, expertise, and ratings. Implemented secure appointment scheduling with calendar integration, automated reminders via email/SMS, and a dashboard for agents to manage leads and client interactions.
 - Tech Stack:** Java, Spring Boot, HTML, CSS, JavaScript, Bootstrap, MySQL, Maven
- Web-based hotel Reservation System for Weddings** JULY - OCTOBER 2025
 - Contribution:** Designed and built an intuitive reservation system tailored for wedding events, allowing users to browse venues, check real-time availability, customize packages (e.g., hall size, catering), and complete bookings with payment processing. Integrated admin tools for hotel staff to handle inventory, confirmations, and reporting.
 - Tech Stack:** Java, Spring Boot, JSP/Thymeleaf, HTML, CSS, JavaScript, MySQL, Maven, IntelliJ
- Heart Attack Prediction System** JULY - OCTOBER 2025
 - Contribution:** Developed a machine learning pipeline to predict heart attack risk using demographic and medical features. Performed EDA, preprocessing, data balancing with SMOTE, feature engineering (PCA, scaling, encoding), and model building using Scikit-Learn. Generated visualizations, evaluation metrics, and optimized the model for accuracy.
 - Tech Stack:** Python, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, Imbalanced-Learn (SMOTE), Jupyter Notebook

Web-based AI Legal Analyzer and Risk Predictor

JANUARY - MAY 2026

- **Contribution:** Developed a secure user management system and a centralized admin dashboard for an AI-driven legal analysis platform. Implemented robust authentication and Role-Based Access Control (RBAC) to manage user permissions, account security, and profile customization with avatar integration. Built a comprehensive administration suite featuring real-time platform statistics, interactive data visualizations for document trends, and advanced user activity monitoring with automated cascading data management.
- **Tech Stack:** Python, FastAPI, MySQL, React.js, Tailwind CSS, Axios, React

Web and Mobile based Movie Booking System

January - May 2026

- **Contribution:** Implemented showtimes and scheduling management for the cinema app — built REST APIs and an admin UI for creating/editing showtimes, time-slot generation, conflict detection, seat-availability calculations, booking snapshots, and integration with the booking and auth flows to ensure reliable scheduling and real-time availability.
- **Tech Stack:** JNode.js, Express, MongoDB (Mongoose), JavaScript, React Native, Axios, Context API, HTML/CSS, npm.
